

Engine Guard with PTFE

Proven to Reduce Engine Wear by Up to 50%!

PART #OL102

Each time you start a cold engine, depending on the outside temperature, it can take up to 60 seconds or more for full lubrication to occur. This is when up to 80% of all engine wear occurs, even when using a high quality motor oil. **Mighty VS7® Engine Guard with PTFE** is proven to reduce engine wear at cold start-up and in extreme driving conditions by up to 50%.

BENEFITS

- ◆ Reduced engine wear at cold start-up
- ◆ Reduces engine wear by up to 50%
- ◆ Treats critical engine parts
- ◆ Reduces friction, heat and wear
- ◆ Extends engine life

APPLICATION

- ◆ Designed for both gasoline and diesel engines
- ◆ Compatible with all viscosity grades of detergent petroleum or synthetic motor oils
- ◆ One 16 oz. bottle treats up to six quarts of oil

Drain used motor oil and change the oil filter. In engines with 3 to 6 quart capacities, refill with a quality motor oil, substituting 16 oz. of Mighty VS7® Engine Guard with PTFE for 16 oz. of oil. No need to wait until engine break-in before using. Will not void manufacturer's warranty.
