

Fuel System Cleaners

PART #FL106

PART #FL108

After 4,000 to 5,000 miles of driving, modern fuel injection systems often lose their responsiveness due to the accumulation of fuel-related deposits. These deposits usually lead to driveability problems such as surging, stalling, hesitation, loss of power and a decrease in fuel economy. Mighty VS7® Fuel System Cleaners remove these deposits quickly and easily, restoring lost performance and improving fuel mileage.

Mighty VS7® Fuel System Cleaner is a detergent/dispersant formula designed to rapidly clean deposits in the fuel system.

Mighty VS7® Supreme Fuel System Cleaner is an advanced synthetic formula that cleans the entire fuel system, including fuel injectors, intake valves, combustion chambers, and induction systems in one easy step. This formula also improves rust protection of the entire fuel system.

KEY FEATURES

- ◆ One application cleans injectors/ carburetor, fuel lines, and fuel pump in both gas and diesel engines
- ◆ Helps prevent fuel system and valve deposits that can cause poor performance
- ◆ Helps eliminate catalytic converter "rotten egg" smell
- ◆ Helps stop engine "after-run"
- ◆ Contains no alcohol that can damage some oxygen sensors
- ◆ Emission system safe

KEEP IT CLEAN

FOR IMPROVED PERFORMANCE AND PROFITS
