

VS7

AVAILABLE SIZE(S): 1 Kit DL6114

## Battery **Service Kit** with Acid Detector

### DESCRIPTION:

Mighty VS7® Battery Service Kit neutralizes and cleans battery acid, improving electrode contact, and helps to inhibit the formation of future corrosion.

Mighty VS7® Battery Terminal Cleaner uses an alkaline, color changing formulation which indicates the presence of acid. Starting as a red liquid, it immediately foams yellow on contact with acid and begins to neutralize and dissolve the corrosion. Once neutralized, the liquid returns to a red color.

Mighty VS7® Anti-Corrosion Battery Terminal Protectors are infused with an anti-corrosion formula and help inhibit future corrosion build up.

### KIT CONTAINS:

2oz. bottle of Battery Terminal Cleaner with Acid Detector and two Anti-Corrosion Battery Terminal Protectors

### FEATURES:

- Non-Toxic, Non-Corrosive Formula
- Biodegradable
- Can be used to detect battery acid leaks
- Inhibits corrosion build up around terminals

### DIRECTIONS:

1. Remove battery cables: negative (-) cable first.
2. Pour a generous amount on corroded areas. Let set for 2 to 4 minutes. Flush area with water. Re-apply if necessary. Wipe dry.
3. Place felt terminal protector between battery terminal and the terminal post. (Remove inner ring for side terminals.)
4. Reconnect battery cables; positive (+) cable first.
