

MIGHTY MAX

NOW WITH M-PLEAT FOR

30% LONGER PROTECTION

YOUR CUSTOMER WINS

with MAX protection
for their engines.

Today's engines are designed to go 7,500-10,000 miles or more between oil changes. At those intervals, some oil filters will become clogged allowing dirty oil to damage the engine.

Mighty MAX spin-on oil filters feature a unique M-Pleat design providing 30%+ more high efficiency media area for greater capacity and longer life. That's MAX protection you can feel good about.

YOU WIN

with MAX profits.

Offering your customers full synthetic oil changes with an extended life Mighty MAX filter will increase your oil change ticket average. That's more profit for you.

MIGHTY MAX THE INSIDE STORY

M-Pleat High Efficiency Media

Provides 30%+ more media* area for higher dust holding capacity and longer life.

Spiral Wound Supporting Core

Constructed from premium grade steel, providing additional internal strength.

100% In-Production-Line Leak Tested

Every Mighty MAX spin on oil filter is leak tested before it's packaged.

High Performance Metal End Caps

High quality adhesives create a tight bond with the media ensuring zero internal leakage during operation.

Heavy Duty Baseplate

Designed using OEM standards for proper fitment and higher burst strength.

Pre-Lubricated Gasket

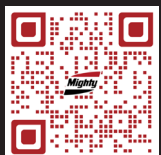

For easy, proper installation every time.

Dust Cover

Protects the filter and gasket until installation.

Silicone Anti-Drainback Valve

Greater resistance to heat than nitrile rubber providing extended protection against dry starts.
